

Rome, July 2013

We wish to thank "Sapienza" University of Rome for admirably hosting the **XXVI Euro-Informs 2013 International Conference on Operational Research**. With more than 3200 scientific contributions and about 3800 participants from 16 different countries, this conference has been the largest European event in Operational Research ever.

Beyond the Rector, prof. Luigi Frati, and the General Director Carlo Musto D'Amore, we wish to thank all the Department and Faculties (Heads and Deans) for the rooms given to the conference sessions: Chemistry; Drug chemistry and technologies; History, cultures, religions; Classics and modern studies; Physics; Physiology and Pharmacology "Vittorio Espamer"; Statistical Science; Earth Sciences; Museum of Classical Art; Information Engineering, Informatics and Statistics; Law; Pharmacy and Medicine, Art and Humanities

Logistics and organisation have been excellent, thanks to the competence and willingness of the different subjects involved that encountered the admiration of all the Congress participants.
